

Projects of the vpsFree.cz Association

Our projects are usually available on [GitHub](#), bugs and issues can be reported there.

vpsFree.cz

Repository	Description
web	The www.vpsfree.cz website.
vpsfree-client	A client for https://api.vpsfree.cz .
build-vpsfree-templates	Scripts used to generate templates of distributions.
salt-configuration	Physical server configuration.
vpsfree-irc-bot	An IRC bot on our channel.
vpsfree-maintenance-tasks	Reusable scripts for administrators.

HaveAPI

HaveAPI is a framework used for the creation of [self-documenting RESTful APIs](#), which was originally created for the vpsAdmin API. However, it is a separate project. Thanks to the ability of the API to self-document, generic clients that do not need to know anything about the API beforehand can be used to communicate with such an API.

Repository	Description
haveapi	Server frameworks/clients.
haveapi-webui	A generic web interface.
haveapi-fs	A file system based on FUSE.
haveapi-dokuwif	Authentication plugin for DokuWiki.

vpsAdmin

[vpsAdmin](#) is an interface used to manage physical servers as well as virtual servers and drive storages and other related things running on them. VpsAdmin was developed in order to meet the needs of the vpsFree.cz association and in the future we would also like to see it running outside of our infrastructure.

Repository	Description	URL
vpsadmin	vpsAdmin main repository.	
vpsadmin-project-manager	Bulk management of all vpsAdmin repositories.	
vpsadmin-config	A vpsAdmin configuration specific to vpsFree.cz.	
vpsadmininstall	An old vpsAdmin installer, currently not working.	

vpsAdminOS

[vpsAdminOS](#) is a Linux distribution based on [NixOS](#) and [not-os](#) serving as a hypervisor for container

virtualisation.

Repository	Description	URL
vpsadminos	vpsAdminOS	
vpsfree-cz-configuration	Configuration of vpsFree.cz infrastructure	

Other

Repository	Description
spl	A fork of https://github.com/zfsonlinux/spl
zfs	A fork of https://github.com/zfsonlinux/zfs
vzctl	A fork of vzctl supporting several distributions and a remote console.

Hosted services

Service	Description	URL
IRC bouncer	See bouncer	https://im.vpsfree.cz/znc/
Paste service	Service for pasting code snippets or program outputs	https://paste.vpsfree.cz
